

Interior **Systems**, Inc.

Hot Aisle Containment (HAC)!!

A Hot Aisle Containment (HAC) system provides a physical barrier between your data center's hot aisle and the rest of the room. This will eliminate the hot and cold air mixing by separating the supply and return airflow. Discharged air from the facility's IT equipment is returned directly to the cooling equipment through a ceiling plenum or ductwork.

We have been working in Data Centers for over **30** years and know the Data Center like very few do. Our knowledge and experience make the difference between on-time and on-budget versus dreaded delays and overruns.

Whether you are looking for a supply and install or an install only, give us a call today. We will be happy to discuss your next project.

Safety First

Completing your project on-time and on-budget is one of our most important goals when we start a project but our most important goal is Safety First. All of our employees have been trained in Safety First techniques and we are **licensed**, bonded and insured to ensure that our clients have nothing to worry about while we are working in their facility.

LET US CARRY THE LOAD FOR YOU ON YOUR NEXT DATA CENTER PROJECT!!

“Interior Systems attention to detail and consistent level of quality shines through on every aspect of their work.”

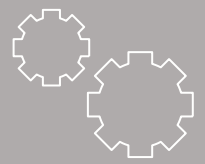

OUR VISION & PHILOSOPHY

TRANSLATE OUR CLIENT'S VISION INTO A SPECTACULAR WORK PLACE

We are **100% committed** to delivering and maintaining our customer's complete satisfaction from initial design to move in readiness, and every detail in between.

We are **100% devoted** to our employees and their families as we believe that is the core of what will drive our dedication and produce the ultimate success for our client.

We believe that if we are **100% pledged** to both our clients and our company as a whole we will consistently deliver the high-quality projects we have promised.

OUR COMPANY'S MISSION

1. **BUILD LONG TERM RELATIONSHIPS**
Create a bond with our clients that goes beyond the client's initial project scope.
2. **ALWAYS BEGIN WITH THE END IN MIND**
Have a clear and concise goal in mind every day so that we know what is needed.
3. **PLAN, TRACK, AND MANAGE EVERY DETAIL**
Details and dedication keeps our drive alive to continuously find new ways to improve.
